

IT solutions to solve your business concerns

TotalinuX, who are we ?

You have to face with business concern such as data deluge, infrastructure complexity or loss of storage performance ?

Created in 2004, TotalinuX is a french compagny providing IT solutions and specialized in HPC and Big Data.

TotalinuX main skills are focused on designing and building IT infrastructure dedicated to computing (HPC), storage (Scale-out, Big Data) and graphical simulation (VDI).

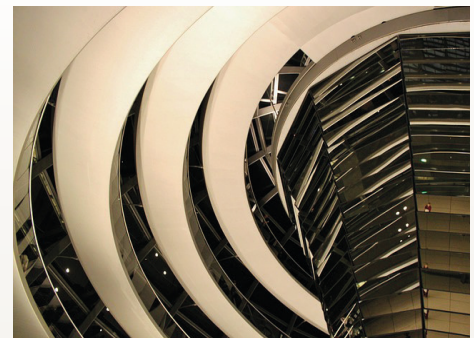

From the deluge of Big Data to the Scale-out storage

As data grows ever bigger, TotalinuX provides storage solutions to enable the preservation of data deluge with revolutionary solution based on Scale-out storage : **Totalscale-out**. This storage is a network architecture in which the total amount of disk space can be expanded as needed.

TotalinuX and the HP Nvidia Grid™ technology

HP NVIDIA GRID™ technology offers the ability to offload graphics processing from the CPU to the GPU in virtualized environments, allowing the data center manager to deliver true PC graphics-rich experiences to more users for the first time. Regarding High Performance Computing (HPC), TotalinuX is a specialist recognized for interfacing and managing computing clusters at very high speed, and use of load balancing software.
